

JS Current Date and Time:

Inside this Current_Date_Time folder you will see the two files one is html and another is js file.

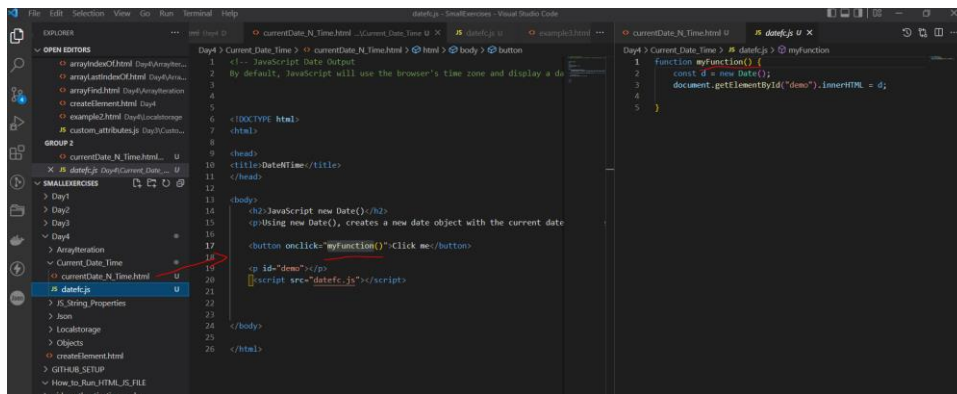

currentDate_N_Time.html

datefc.js

Note: External js is added you can check in the html file.

In html file when button is click then myFunction() method will call.

myFunction () method is declared in js file see the below image.

If you want to run this project then follow the **How_to_Run_HTML_JS_FILE** folder.
